

Edge Beveling Machines KF 200

SKU : 101350

Especially edges on very large workpieces are easier to chamfer with and hand-guided machine. Workpieces that are very difficult to handle due to their size or weight, like large metal sheets, long profiles or large weldments, can easily be machined, from deburring to chamfering and weld joint preparation.

- Compact dimensions:
- Robust design
- Immediately ready to use

TECHNICAL SPECS

WORKING AREA

Speed	3500 1/min
Guide bar length	200 mm
Angle adjustment	15 - 45°

DETAILS

Chamfer height	0 mm - 5 mm
----------------	-------------

DRIVE CAPACITY

Motor rating main drive	0.37 kW
-------------------------	---------

MEASURES AND WEIGHTS

Overall dimensions (length x width x height)	0.36 m x 0.2 m x 0.26 m
Weight	11 kg

PRODUCT DETAILS

- For chamfering, deburring and 45° beveling of steel, aluminum and many other materials
- Simple operation
- Tungsten alloy blades for ultimate tensile strength, hardness and long service life

STANDARD EQUIPMENT

Set of cutting inserts
Operator manual

KNUTH on YouTube Information to the point

On our YouTube channel you can find videos for nearly all machines from our program. We show the machines from current deliveries and you get an impression of the handling, the processing quality and the machining performance.

**Are you interested in a machine for which you cannot find a current video?
